

CERTIFIED PUBLIC ACCOUNTANTS | STRATEGIC BUSINESS CONSULTANTS

NONPROFIT SERVICES

Nonprofit organizations face increasing scrutiny from all directions. Government regulators, donors and funding sources are all demanding transparency regarding financial and compliance reporting, professional governance by boards of directors and their audit committees, and accountability for funds deemed to be in the public trust. And more stringent rules increase the threat to the organization's tax exemption status. Our nonprofit clients realize we understand the nonprofit industry cold and we can help them deliver their program services, manage their cash flow and fundraise with the knowledge that they are in compliance in fact and in appearance.

The **rbz** Nonprofit Service Group consists of a unique group of dedicated professionals, each with extensive personal and professional nonprofit experience. We know the industry because we have been a vital part of it for many years. As nonprofit experts we are continually sought out as writers, speakers and instructors to other professionals. Our Nonprofit Service Group constantly monitors the regulatory environment to spot trends and changes before they happen. And our unique perspective brings more to your engagement than auditors—you are engaging nonprofit businesspeople.

Your mission. Our expertise.
